Thank you for your trust and for purchasing this product. This instruction manual is included with the product. It contains important instructions for commissioning and operating the product. If you pass the product on to other persons, make sure that you also give them this manual. Keep this manual so that you can read it again at any time!

Smart TV box

Precautions before use
To prevent fire, electric shock and product damage, do not allow the player to come into contact with rain, moisture or liquid. Do not place vases or other water containers on the player.
To ensure good ventilation, do not place the player in bookcases, cabinets or other enclosed areas. Keep it well ventilated to prevent fire or electric shock caused by overheating the player. Keep lighted candles and other lighted objects away from the player. Do not open the player case. This should only be done by a specialist.

Location of emission units
Place the player on a flat surface. Protect it from sunlight and avoid heat, moisture and frequent shocks to avoid damaging the case and other player components and shortening the life of the player. For best player performance, do not place heavy objects on the player. and keep it at least 6 inches from the wall.

Power problems
Do not use surge voltage, otherwise the player will be damaged and could cause a fire. Connect the power cord correctly and make sure the cord is not damaged. If you do not use the player for a long time, disconnect the power cord to prevent damage caused by a sudden electrical impulse.

Moisture problems
Keep the player out of damp places, such as the basement.
Moisture condensation can cause damage to the player. In this case, turn on the player and the heat of the player can dissipate the moisture.

About the User Guide
Read the user manual carefully and keep it in a safe place for inspection. The images in this User Guide may differ from the images shown on the TV due to differences in firmware. If any of the components need to be replaced, make sure that only approved components are used. Otherwise, it may cause fire, electric shock or other damage.
