Power connection

CAUTION

Turn off the power supply before installation or maintenance.

Read the manual before installation.

Input voltage: -230 V 50Hz AC.

Cable marking: Brown – (L), Blue – (N)

Remove the dirt and dust with microfiber wipes.

Avoid direct looking at the LED source light.

Do not cover by insulating material.

Do not use this product in unsuitable places.

Do not use this product in environmental conditions which endanger construction, paint coat, electrical equipment of luminaire. These conditions are high humidity, high temperature, dustiness, the presence of no indifferent chemical substances in the air, UV radiation, shocks, and vibrations.

Do not use the product in special conditions.

Making any work inside the housing with the power on may cause an electric shock.

The manufacturer is not responsible for any defects caused by not following the instructions in this manual.

The producer reserves the right to change the design of the product.

To maintain the safe operation of the luminaire, follow the installation instructions.

Handling of used luminaires:

Lamps (luminaires) LEDs must be disposed of following current environmental regulations. Worn-out luminaires should be returned to the appropriate collection point where they will be accepted free of charge.

Correct disposal of electrical equipment helps to preserve valuable natural resources and avoid negative impacts on health and the environment, which may be threatened by inappropriate waste management.
